

Add Two Numbers :

Add Two Numbers:

```
const a = 5;  
const b = 6;  
const sum = a+b;  
console.log(sum);  
//output : 11
```

Add Two Numbers Entered by the User:

Here, `prompt()` is used to take inputs from the user. `parseInt()` is used to convert the user input string to number.

```
const num1 = parseInt(prompt("Enter user first number "));  
const num2 = parseInt(prompt("Enter user two number "))  
const sum = num1 + num2;  
  
console.log(sum);
```
